**The Grémillet Sisters - Volume 1 - Sarah's Dream**
Independently Published

La souris Pâquerette a disparu. Chlorophylle et Minimum comprennent très vite qu'elle a été enlevée par le terrible monstre du lac. Sans perdre un instant, les deux compères et leurs amis se lancent sur les traces de la créature. Mais la chasse au monstre leur réserve bien des surprises... René Hausman et Jean-Luc Cornette unissent leurs talents pour rendre un éblouissant hommage au héros culte de Raymond Macherot.

**Scarred Regrets**
Dogwise Publishing

When a creature of the treetops listens to the song of a snake, she finds herself drawn into an adventure deep under the earth. Witch-Hazel was never good at being a squirrel. She could never find her lost stashes of acorns, but maybe she can prove herself by finding a treasure that matters much more -- the lost Celestial Fragments of the All-Being. Witch-Hazel's quest takes her through labyrinths, lost mole cities, and underground kingdoms. She faces riddles from a leontaur, an army of ghost moles, and sorcerer crabs, but
she also makes unexpected friends. Can Witch-Hazel find the Celestial Fragments and make it back to the sunlight world above? If she survives, will she be the same squirrel who began her journey, or has she been forever changed by the snake's song?

_Darwin in Russian Thought_ Humanoids Inc

'I was covered in blood, but it wasn't mine, so it was okay.' Edward is a hit man. He specialises in monsters. Vampires, shape-shifters, anything and everything. There are people like me, Anita Blake, who do it legally, but Edward doesn't sweat the legalities or, hell, the ethics. He is an equal opportunity killer. I may be one of the few friends that Edward has, but it's like being friends with a tame leopard. It may curl on the foot of your bed and let you pet its head, but it can still eat your throat out...

_The Golden Droplet_ Schiffer Publishing

When 'MS' interviews the mysterious 'XX' for a job, she hires him straight away - because she thinks he's gorgeous. From that moment All This Has Nothing To Do With Me is an exposé, a dissection of a broken heart. It is also highly original, extremely funny, and deeply, darkly moving: a sparkling gem of a novel about unrequited love and the hoops we are prepared to jump through in its name, and an unputdownable glimpse into the depths of one woman's psyche.

_La Lumière électrique_ Cambridge University Press

Laney Keating's senior year of high school sucked. It began with one moment of weakness, one stupid gesture for a hopeless crush. Then the rumors started. Slut, they called her. Queer. Pillhead. Psycho. Mentally ill, messed up, so messed up even her own mom decided she wasn't worth sticking around for.

_Secret Societies_ Europe Comics

Charlie Hanson has a clear vision of his future. A senior at Brighton School of Mathematics and Science, he knows he'll graduate, go to MIT, and inevitably discover solutions to the universe's greatest unanswered questions. He's that smart. But Charlie's future blurs the moment he reaches out to touch the tattoo on a beautiful girl's neck. The future has never seemed very kind to Charlotte Finch, so she's counting on the present. She's not impressed by the strange boy at the donut shop—until she learns he's a student at Brighton where her sister has just taken a job as the English teacher. With her encouragement, Charlie orchestrates the most effective prank campaign in Brighton history. But, in doing so, he puts his own future in jeopardy. By the time he learns she's ill—and that the pranks were a way to distract Ms. Finch from Charlotte's illness—Charlotte's gravitational pull is too great to overcome. Soon he must choose between the familiar formulas he's always relied on or the girl he's falling for (at far more than 32 feet per second squared).

_Effects of Trawling and Dredging on Seafloor Habitat_ Vintage

A new book of poetry by one of the major young French poets.

_Une aventure de Chlorophylle par Hausman et Cornette_ Entangled: Teen

The USA Today bestselling author tempts success in this stunning debut novel. National bestselling author Eileen Wilks draws readers into a bold new world where
the magical and mundane co-exist in an uneasy alliance—and a cop balanced on her own knife-edged struggle is their only hope against a cold-blooded killer. *The Haunted Screen* Quick Trading Company

Concerns over the potential ecological effects of fishing have increased with the expansion of fisheries throughout the marine waters of the United States. Effects of Trawling and Dredging on Seafloor Habitat describes how assessment of fishing impacts depends on gear type, number and location of bottom tows, and the physical and biological characteristics of seafloor habitats. Many experimental studies have documented acute, gear-specific effects of trawling and dredging on various types of habitat. These studies indicate that low mobility, long-lived species are more vulnerable to towed fishing gear than short-lived species in areas where the seabed is often disturbed by natural phenomena. Trawling and dredging may also change the composition and productivity of fish communities dependent on seafloor habitats for food and refuge. The scale of these impacts depends on the level of fishing effort. This volume presents color maps of fishing effort for all regions with significant bottom trawl or dredge fisheries—the first time that such data has been assembled and analyzed for the entire nation.

*Tempting Danger* The Rosen Publishing Group, Inc

The best part of Christmas is getting to hear one of Uncle Paul's stories. This year, Uncle Paul treats the kids—and us—to the story of the real-life boy who inspired the beloved Spirou. It's 1929. Ptirou is a circus acrobat who, while the world's economy is crashing, sees his own world fall apart. Orphaned, and possessing only his skill, a bottle of perfume, and an inherited dream, Ptirou sets out for New York and new adventures. With saboteurs on one side, the lovely Juliette on the other, and his own knack for mischief, Ptirou finds adventure aboard an ocean liner before it's even left port.

*Chlorophylle et le monstre des trois sources* St. Martin's Press

According to ancient Japanese protocol, foreigners deigning to approach the emperor did so only with fear and trembling. Terror and self-abasement conveyed respect. Amélie, our well-intentioned and eager young Western heroine, goes to Japan to spend a year working at the Yumimoto Corporation. Returning to the land where she was born is the fulfillment of a dream for Amélie; working there turns into comic nightmare. Alternately disturbing and hilarious, unbelievable and shatteringly convincing, *Fear and Trembling* will keep readers clutching tight to the pages of this taut little novel, caught up in the throes of fear, trembling, and, ultimately, delight.

*The Hotel* Benjamin-Cummings Publishing Company

Broken men don't fall in love. We linger in the darkness, consumed by the sins that define us. Irina is the sole reason my heart beats. She's everything that matters in a world filled with evil that a woman so good and pure should never have to see. She'll add another scar to my collection - this one engraved on my heart. When she's taken by our enemy to use for his vengeance. Even knowing she can never be mine, I'll stop at nothing to see her safe. The Irina I rescue isn't the same feisty woman they stole. Her soul is broken. Her heart is hollow like mine,
because of the things she's seen. She needs me in a way I've never known. And I will destroy the man who shattered what's mine. Scarred Regrets is a full-length standalone romance, but the series presents a better reading experience when following the suggested order. This series contains dark elements, including over-the-top antiheroes who do as they please. Read at your own discretion.

**Fear and Trembling** Le Lombard

Humankind has pervasively influenced the Earth's atmosphere, biosphere, geosphere, hydrosphere and cryosphere, arguably to the point of fashioning a new geological epoch, the Anthropocene. To constrain the Anthropocene as a potential formal unit within the Geological Time Scale, a spectrum of indicators of anthropogenically-induced environmental change is considered, and shown as stratigraphical signals that may be used to characterize an Anthropocene unit, and to recognize its base. This volume describes a range of evidence that may help to define this potential new time unit and details key signatures that could be used in its definition. These signatures include lithostratigraphical (novel deposits, minerals and mineral magnetism), biostratigraphical (macro- and micropalaeontological successions and human-induced trace fossils) and chemostratigraphical (organic, inorganic and radiogenic signatures in deposits, speleothems and ice and volcanic eruptions). We include, finally, the suggestion that humans have created a further sphere, the technosphere, that drives global change.

**The Snake's Song** Pan Macmillan

For the price of a fifteen minute consultation with your vet this book provides hours of reading pleasure. In 391 easy-to-read pages you can discover masses of information not available in the libraries of veterinary textbooks. If you are a pet owner this book will likely be one of the best investments that you have ever made. Big savings in vet bills and feed bills are likely to be measurable benefits. But how can you measure the benefits of pain-free happy pets? How can you measure your feelings? -- knowing that you have done the best for the pets in your care. You can't. But you and your pets can experience those feelings -- because Raw Meaty Bones: Promote Health.

**Whales and Seals** Univ of California Press

Book on expressionism in German motion pictures.

**Human Anatomy** Hachette UK

Because Neptune is so distant, it has been hard to study. This book introduces readers to the mysterious planet farthest from our Sun. Its composition, features, and history, as well as its hostile environment, are explained. The many beautiful illustrations will draw in reluctant readers and budding astronomers alike.

**Neptune** Les Impressions nouvelles

Very few people can claim to know as much about whales and the seals as Pierre-Henry Fontaine. His secret lies in a boundless passion for these marine mammals. To understand this, it is necessary to imagine the author climbing inside the belly of a stranded Blue whale, to find and to show you his aorta. That he will do this is a reflection of his concern for marine mammals and educating the world about them that is so clearly seen in this work. This exciting new edition of a classic reference about marine mammals is enriched and expanded, presenting recent and new information, accompanied by
many diagrams and illustrations. In addition to new information on whales, expanded chapters present the anatomy, physiology and the ecology of the pinnipeds, with expansive fact sheets of some species of seals and Walrus. This is a detailed picture of the lives and environments of whales and seals, including chapters on anatomy, adaptation to aquatic life, nutrition, migration, reproduction, and parasites and enemies. The interaction of man with these marine animals is also explored, as is their paleontology. New information and 678 color diagrams and illustrations help illuminate the lives of these mysterious animals. Fact sheets on Mysticetes, Odontocetes, and Pinnipeds, a glossary, and an extensive bibliography provide additional information essential to the study of whales and seals, leaving the reader more fully informed. With this book, all readers, from the curious to the scientist, will find much to further their knowledge of, and fire their passions for, these impressive denizens of the deep.
